

GARIMA JAIN

Phone / Whatsapp Number: (+91) 9425750729
Email: garimaj012@gmail.com
Linked in: [garima-jain-93941316a](#)
Address: Marathahalli, Bengaluru, Karnataka 560037

EDUCATION

Bachelor of Technology, (B. Tech.) in Computer Science and Engineering (CGPA: 8.71)
Indian Institute of Technology - IIT, Patna (Bihar)

July 2018 - May 2022

WORK EXPERIENCE

- | | | |
|--|--|-----------------------------|
| Founding Engineer (Full time) | Anyteam (Early-stage startup) | Nov 2025 - Present |
| <ul style="list-style-type: none">Spearheaded a Langfuse-based LLM cost attribution system across 7 microservices (React, Node.js, FastAPI, WebSocket), integrating traceability for 6 AI providers (OpenAI, Anthropic, Gemini, Perplexity, DeepSeek, ElevenLabs) with per-user spend tracking - fixed a context propagation bug that left ~65% of API calls unattributed, enabling executive cost dashboards that drove model optimization decisions.Engineered a full-stack WebSocket response correlation system (React/TypeScript + Python/FastAPI + asyncio) with a 3-level priority matching protocol, resolving race conditions across 8 concurrent message flows - eliminated silently dropped AI responses and fixed async context leaks, directly improving chat reliability for all active users.Built an enterprise-grade AI-powered development environment using Claude Code, custom MCP servers (Langfuse x5, Context7, Atlassian), Slack API session tracking, Docker Compose orchestration, and git worktree isolation across an 8-repo platform - with automated PR review skills, hook-based notifications, and per-repo CLAUDE.md architecture guides, accelerating team feature delivery. | | |
| Software Engineer (Full time) | Venwiz Technologies (Early-stage startup) | June 2023 - Nov 2025 |
| <p>Part of vendor data ingestion, vendor discovery teams at Venwiz, to engineer solutions to scout the best suitable vendors across India for a given industrial job.</p> <ul style="list-style-type: none">Architected and deployed a scalable vendor data enrichment pipeline and orchestration service from scratch using AWS (SNS, SQS, EKS, S3), NestJS, and MongoDB, increasing vendor coverage from 30K to over 200K. It achieved a processing rate of 4,000 vendors/hour and reduced manual effort for getting vendor data by 99%.Engineered an AI-powered vendor search engine using Elasticsearch and OpenAI, achieving 85% search relevance across 1M+ vendors with a 4-5 second response time and slashing vendor scouting time from 10 days to 1 day. Explored Neo4j for graph-based categorization and semantic search using vector database before migrating to the upgraded setup for better scalability, cost efficiency and search flexibility.Designed and scaled a high-throughput web scraping infrastructure on AWS, re-architecting it from a Requests and BeautifulSoup setup to Crawlee, eliminating child link fan-outs, resolving MongoDB bottlenecks, and achieving 5,000+ websites/hour throughput with substantial infrastructure cost savings. Additionally, utilized Scrapy for efficiently crawling structured and fixed-format websites.Built and shipped a client-facing, AI-driven Vendor Intelligence platform in a two-week sprint with a 4-person team, owning full-stack development of key features like a concurrent-safe subscription management and an AWS S3-optimized bulk vendor addition workflow. | | |
| Software Engineer II (Full time) | Google India Pvt Ltd (Google Pay) | July 2022 - May 2023 |
| <p>Part of UPI Autopay Platform team at GPay to engineer solutions for letting users pay their recurring bills and subscriptions automatically.</p> <ul style="list-style-type: none">Designed, implemented and successfully launched compliance feature from NPCI, that disables revoke functionality on subscriptions belonging to loan and debt collection merchants, impacting 10K+ subscriptions across 20 merchants.Designed and developed the subscription creation flow as a part of a bigger project to integrate various 1P clients such as billpay, mobile recharge, fast tag, loans etc. with Autopay. This project involved extensive collaboration with frontend and client teams.In both the projects, the APIs were developed in Java using an internal framework equivalent to Springboot, gRPC was used as RPC framework for microservices communication through Protocol buffers, Guice was used for dependency injection, Spanner was used for storage, Junit and Mockito were used for testing the APIs. | | |
| <p>Software Engineer STEP Intern (May 2020 to July 2020) and Software Engineer Intern (May 2021 to July 2021) at Google Ads and GPay.</p> | | |

SKILLS AND INTERESTS

Languages: Python (Proficient), C++ (Proficient), Java, Typescript, Javascript, C, HTML, CSS, MySQL
Technologies/Tools: Nest.js (a Node.js framework), Flask, Vue / Vue.js, React, Postgres, MongoDB, Neo4j (a graph DB), Firebase Realtime Database & Authentication, Spanner DB, Elasticsearch, RabbitMQ, Guice, gRPC, Junit, Mockito, Docker, Kubernetes, AWS (EKS, SNS, SQS, Lambda, ECR, S3), GCP (GKE, GCS), CSS framework Bulma, Bootstrap, Linux, Shell, Git, Github, Claude code, Cursor, Copilot
Areas of Interest: Generative AI, Backend development, Web application development, Fintech

ACHIEVEMENTS

- Recognized as **fast executor thrice** by **Venwiz** and awarded cash prizes.
- Selected among **40 interns** out of thousands of applicants all over India in **Google STEP internship program** [Github](#)
- Secured a rank of **175** at **ICPC Amritapuri Regionals 2020** among the 700+ qualified teams. [ICPCID](#)
- Secured global rank of **666** in **Google Kickstart** in Round G, 2020 among 10k+ candidates.
- Highest rated **1959 & ranked 4-star** on CodeChef platform. [Profile](#)
- Highest rated **1608 & ranked as EXPERT** on Codeforces platform. [Profile](#)

EXTRACURRICULAR ACTIVITIES

- | | |
|---|------------------------|
| Teaching Assistant at Scaler Academy to resolve queries related to Data Structures and Algorithms of students. | Jan 2022 - June 2023 |
| Assistant Head Coordinator of Training and Placement Cell, IIT Patna. | July 2020 - April 2022 |
| Competitive programming Sub-coordinator of the Coding Club of IIT Patna, NJACK. | July 2019 - July 2020 |
| Been an active Problem setter and tester in competitive programming contests conducted by NJACK IIT Patna. | |
